EXPERIENCE

Trackly

Founder and product builder

2025-present
Bay Area

Built and operates a real-time job-search product across web, native apps, CLI, MCP, matching, chat, and voice.

- Built the direct career-page monitoring, normalization, matching, eval, and delivery system behind a public inventory spanning 1,969 companies and 40 ATS/source types as of July 12, 2026.
- Designed LLM classification and review workflows for function, seniority, region, sponsorship, salary, and experience signals, including disagreement review and guarded backfills.
- Shipped one product across web, iOS, macOS, a public npm CLI, and an MCP server, with shared API contracts and interface-specific workflows.
- Built streaming chat and real-time voice agent workflows with tool status, confirmations, citations, interruption handling, model failover, and observability.

PayPal Checkout

Technical Product Manager MBA Intern

May-August 2025
Chicago, Illinois

- Drove strategy for a Checkout AI observability prototype across a diagnostic environment serving a multi-sided marketplace.
- Built an agentic diagnostic workflow using Claude, Datadog, APIs, and MCP patterns, reducing issue-detection time 75% in the internship prototype workflow.
- Unified the investigation path across 15+ diagnostic tools and defined success measures for mean time to detect and resolve.
- Designed an auto-triage POC that diagnosed issues, estimated impact, and routed alerts to owners, completing triage 5x faster.

Banco de Credito del Peru / Credicorp

Product Analyst -> Product Manager -> Senior Product Manager -> Lead Product Manager

2018-2024
Lima, Peru

Progression: Lead Product Manager (1 year), Senior Product Manager (1.5 years), Product Manager (1.5 years), Product Analyst (2 years).

- Launched and scaled an SMB marketplace to 180K MAU by integrating lending, insurance, and payments, improving cross-sell per client by 28%.
 - Led research, roadmap, pilot, and launch for personalized lending, reducing processing from seven days to immediate approval and generating \$40M in nine months.
 - Launched a unified data, identity, and AI-risk architecture that supported 26% year-over-year sales growth and sixfold website traffic.
 - Managed nine product direct reports and partnered with risk, compliance, engineering, design, analytics, and commercial teams.
 - Used ML-driven pricing experiments to increase conversion 32% and reach 19.6% market share in seven months.
 - Led digital-wallet API partnerships that grew sales from zero to \$20M in six months and co-led a GTM program that reached \$55M in monthly digital sales.
-

EDUCATION AND SELECTED WORK

University of California, Berkeley, Haas School of Business

Master of Business Administration, STEM-designated

May 2026

- Built Trackly across App Store, web, public npm CLI, and MCP; selected for Microsoft for Startups and featured by Berkeley Haas.
- Selected for Berkeley's Open Innovation Squad to lead AI product strategy for MoBagel, a YC-backed no-code ML platform.
- VP, Tech Club; co-launched Haas's first Tech & AI Summit with 560+ registrations.

Pontifical Catholic University of Peru

Bachelor of Science, Industrial Engineering

July 2018

WORKING RANGE

AI product strategy, agent workflows, LLM evals, API and MCP integration, observability, experimentation, marketplaces, fintech, analytics, Figma, SwiftUI, TypeScript, and AI-assisted development.
