

AI PM who can build the product and stay close to the system.

Berkeley Haas MBA, May 2026. Ex-PayPal AI observability. BCP/Credicorp fintech scale. Builder of Trackly across web, iOS, macOS, CLI, and MCP.

TARGET ROLES AI PM, Technical PM, platform PM
LOCATION Bay Area
WORK AUTHORIZATION Eligible for up to 3 years OPT/STEM OPT. No sponsorship needed for next role.

Hiring thesis

I am strongest when product work is technical and messy: agents, observability, fintech, recruiting infrastructure, and developer tools. The pattern is pretty consistent. I get close to the system, find the user pain, and ship something people can actually use.

Proof points

Trackly Real-time job-search agent across web, iOS, macOS, CLI, and MCP. 1,900+ companies and 128,975+ roles shown publicly. Case
PayPal Checkout Technical PM internship building AI observability tooling across 15+ checkout systems, with 75% faster issue detection in the project workflow. Case
BCP / Credicorp Digital-first fintech products tied to 100K+ SMBs and underserved customers plus a \$620M ARR/P&L portfolio. Case
AI-assisted workflows Public GitHub work across MCP, CLI, LLM observability, evaluation loops, and AI-assisted shipping systems. Case

How to use these claims

- PayPal work should stay at the resume-approved level. No internal diagrams, logs, screenshots, or system names.
- The \$100M PayPal number is a modeled or targeted opportunity, not achieved impact.
- Trackly 500+ MAU is an internal snapshot. Public coverage claims should cite the live Trackly site.
- OPT/STEM OPT language is eligibility wording, not legal advice.
